**Vasculata™ 2019** is an intense three and a half days conference introducing the basics of cardiovascular biology and disease with an emphasis on new approaches to treating these diseases. Cutting-edge research in various fields of cardiovascular medicine will be presented. Vasculata combines a self-study program and seminars from leaders in the field with optional hands-on workshops, thus providing attendees with a unique learning experience in cardiovascular scientific discipline not commonly covered in textbooks or didactic courses.

**KEYNOTE SPEAKERS**

**LUISA IRUELA-ARISPE, PhD**
Distinguished Professor of Molecular Cell and Dev. Biol.
Director, Molecular Biology Institute
Chair, Molecular Biology IDP
University of California, Los Angeles

**CURT D. SIGMUND, PhD**
James J. Smith & Catherine Welsch Smith Professor of Physiology
Chair, Department of Physiology
Associate Director, Cardiovascular Center
Medical College of Wisconsin

**SELECTED CONFERENCE PRESENTERS**

Isabella Grumbach, MD, PhD
University of Iowa

Sean Palecek, PhD
University of Wisconsin at Madison

Alexander Staruschenko, PhD
Medical College of Wisconsin

Andreas M. Beyer, PhD
Medical College of Wisconsin

**ORGANIZERS**

Veronica Flood, MD; Michael Widlansky, MD; Daisy Sahoo, PhD, and Ramani Ramchandran, PhD
