

Vascular Biology Research Network

https://www.navbo.org

Why Join NAVBO

- NAVBO provides its members with numerous opportunities to display your science, interact with peers, discuss your work with renowned scientists, and stay current with cutting edge findings and resources in vascular biology research.
- NAVBO membership provides year-round value whether you are an established investigator, postdoc, or student.
- Become part of this vibrant community of investigators who collaborate on basic, translational, and clinical vascular studies.
- Be part of the team reshaping our understanding of vascular development and pathophysiology and supporting the advancement of cardiovascular 🔛 medicine.
- Work with NAVBO's leaders and play a crucial role in facilitating, expanding, and broadcasting vascular biology research.

Apply online www.navbo.org/join

Regular Membership - hold an advanced degree or have professional experience in the field. Dues: \$135US/year

Trainee Membership - from undergraduates to postdoctoral fellows and technicians. Trainee applicants must be sponsored by their academic supervisor, laboratory head or department chair. Dues: \$55US/year

Membership pays for itself! Includes discounts to meetings - both live and virtual!

North American Vascular Biology Organization 18501 Kingshill Road Germantown, MD 20874-2211 https://www.navbo.org

Members' Research

Build Your Network

- Meet and interact with colleagues inside and outside your discipline
- Join an online community of vascular biologists
- Participate in NAVBO committees
- Attend meetings with reduced registration rates
- List your online publications on the NAVBO ePub page and in the NAVBO NewsBEAT
- Post your upcoming meeting presentations on the website and in the NAVBO NewsBEAT

Get Recognition

- Your online publications listed on the website and in the NAVBO NewsBEAT
- Post your upcoming meeting presentations online and in the NewsBEAT
- Your lab featured in the NewsBEAT and home page
- Present your work in an online session
- Receive awards including:
- Travel Awards
- **Outstanding Poster Awards**
- Springer Junior Investigator Award
- Judah Folkman Award in Vascular Biology
- Earl P. Benditt Award

Communicate with Colleagues

- Receive the NAVBO newsletter
- Access the online NAVBO Directory of Members
- Receive notice of upcoming events, meetings, NIH news, and other late-breaking news
- List your online papers on the NAVBO ePub page
- Post your upcoming meeting presentations
- Discounts on subscriptions to certain journals
- Advertise your post-doctoral opportunities, jobs and meetings

Resources

- Monthly Vascular Biology Publications Alert
- Bi-weekly electronic newsletter, the NAVBO NewsBEAT, contains links to relevant science news
- List of Training Grants
- Fundamental Paper Archive
- Access colleagues through LinkedIn group
- Lessons Learned from Junior Faculty
- Leaders' Lessons from Senior Investigators
- YouTube Channel
- NAVBO Career Center (discount for members)
- Plus more on our website (links to other organization, journals and other agencies)

About NAVBO

For over twenty-five years, NAVBO has provided a communication network for a diverse community of basic and clinician scientists from multiple disciplines and specialties involved in cardiovascular research. Through its website, newsletter, publication alerts, meetings, webinars, and workshops, NAVBO has brought together clinicians, investigators, and trainees to address scientific problems via approaches that integrate different perspectives and expertise. From an ambitious beginning in 1994, we have established an organization that recognizes the professional achievements of its members and strives to nurture and advance their career development and research goals.

... "NAVBO has been integral for me in achieving my goals. It has always been such a tremendously supportive society. *The meetings have given me a platform to share my science,* put out new ideas, and receive critical feedback to refine my work moving forward".

Amber Stratman, Washington University

... "NAVBO does an unbelievable job putting together a program that includes so many leaders of multiple fields that it's hard not to meet or see someone that has influenced your work" Brian Sansbury, Harvard Medical School

... "NAVBO meetings provide a platform for vascular biologists from different focus areas to come together and collaborate freely. Scientists and scholars get to enhance discussion and promote collaboration" Ajit Muley, Columbia University Medical Center

"The NAVBO conferences are a great opportunity to meet researchers at all levels in both your immediate and adjacent fields. The size of the conference is also one that allows for direct scientific interaction amongst the trainees and the thought leaders of the field" *Monica Lee, University of Illinois*

Dedication to Trainees

- Various awards and scholarships
- Interactions with established investigators
- Opportunities to present research
- Career Development sessions at meetings

NAVBO Provides Value

	VALUE	
INCLUDED WITH MEMBERSHIP	Regular	Trainee
Monthly Webinars	\$300	\$300
Discount on Job Postings	\$150	
Vascular Biology Publications Alert	\$55	\$55
Discounted Registration for Annual Meeting*	\$130	\$285
Discounted Vasculata Registration		\$75
Potential Annual Savings	\$635	\$715

*when held in person; based on 2019 rates

Plus other PRICELESS benefits such as promoting your work, presenting in online sessions, networking, and much more!

Lunch and Learn for Trainees at Vascular Biology 2019 Meet with speakers and senior investigators

2019 Travel Award Winners

NAVBO Meritorious Awards

Drs. Anne Eichmann, Bhama Ramkhelawon and William Sessa 2019 Meritorious Award Recipients

Vascular Biology

tures award lectures. sessions on career development, and special general sessions; it's frequently in collaboration with guest societies. It targets current and emerging areas of interest to the vascular biology community and features two of the following workshops- Developmental Vascular Biology and Genetics, Vascular Matrix Biology and Bioengineering, the Biology of Signaling in the Cardiovascular System, and Vascular Inflammation.

Vasculata[™] Summer Course

Is an intense three to four day course targeting newcomers to the vascular biology field and offers a great overview for those in specialized areas. This course introduces attendees to the basics of cardiovascular biology through seminars and hands on workshops that provide unique learning experiences.

International Vascular Biology Meeting

The IVBM, when held in North America, is sponsored by NAVBO. This meeting fosters global learning and collaboration by inviting the entire international

Online Events

NAVBO provides different online learning experiences for scientists at every level. including webinars with key investigators, journal clubs, which include a discussion forum, panel discussions on various topics, and online symposia.

NAVBO Meetings

The annual meeting fea-

vascular biology community together. The next North American IVBM will be October 13-17, 2022 in the San Francisco Bay Area.

Lymphatic Forum

Co-sponsored with the Lymphatic Education & Research Network, it takes place every other year; the next one is June 2021 in Banff, Canada. It covers the newest areas in lymphatic research and therapies.
